

## Instructions for Good and Services Search

Print out the goods and services sheets and cut them into separate pictures.

Separate the participants into two teams. A "Goods" team and a "Services" team. If there is only one player, they can race against the clock.

Hide the goods and services pictures throughout your house and yard, if weather permits. Send the teams on the hunt for only what they are assigned to find (goods or services). If they find a picture the other team is searching for, they need to leave it where they found it.

When they find a picture, they need to race back to the starting point and create a pile. Once they have all 9 pictures, they need to put them in alphabetical order.

The first team to find all nine items and put them in alphabetical order wins.
